北里大学医療衛生学部

ようこそ北里大学医療衛生学部へ。
本学部は、1962年に開学した北里大学最初の学部である衛生学部を母体として、1次から3次予防の高度な専門知識と技術を学ぶ日本初の医療系学部として、1994年に誕生しました。その教育・研究には「最先端の医療への貢献」と「人を思いやる心を大切にする」学祖北里柴三郎の「北里精神」が息づいています。このA1号館は医療衛生学部を主体とし、日建設計・大成建設・紀伊屋書店・学内関連部署が加わった素晴らしいチームワークにより2020年7月に竣工しました。機能性を追求した中で、随所に「北里精神」に由来するメッセージを掲げています。

Welcome to Kitasato University School of Allied Health Sciences!
Our department was established in 1994, emerging out of the School of Hygienic Sciences, the oldest department at Kitasato University founded in 1962. The School of Allied Health Sciences is the first medical science faculty in Japan to teach highly advanced knowledge and skills essential to primary through tertiary prevention to teach highly advanced knowledge and skills. Our education and research philosophy is rooted in the Kitasato Spirit and honors the two commitments pledged by our founder Dr. Shibasaburo Kitasato: "contribution to cutting-edge medical care" and "compassion for others." Home to the School of Allied Health Sciences, this A1 Building was completed in July 2020 by the brilliant teamwork of Nikken Sekkei, Taisei Corporation, Kinokuniya Company, corporate administrators, and others. The building is not only exceptionally functional, but it is also imbued with the Kitasato Spirit.
